

Renna™ Transitions Ordering Guide

Mix and match Renna™ transitions and run lengths to create one-of-a-kind designs. Use this guide to learn more about the available transitions, their sizes and nomenclature. Transitions can be combined with straight fixtures to create layers of light around your environment. Simply sketch your layout to determine the number of transitions and straight sections needed then upload your drawing to the RFA tool to get a submittal drawing and full bill of material. See below for an example.

Straight Fixtures: Consult individual product spec sheets for complete fixture options

Pendant Mount: RNNAD - Renna Direct (Static & TUWH) | RNNAI - Renna Indirect | RNNALD - Renna Indirect Direct

Surface Mount: RNNAS - Renna Surface Mount

Vertical Wall Wash: RNNAVWW - Renna Vertical Wall Wash Suspended Linear

** For fixed Mini Obtuse Angle **XX** will be equal to a range of 60 - 89 degrees. Example RNNATR **73FC4**

*** For fixed Mini Acute Angle **XXX** will be equal to a range of 91-162 degrees. Example RNNATR **132FC4**

When using specialty transitions please contact the factory for details and lead times
